

# Technical Films Converting

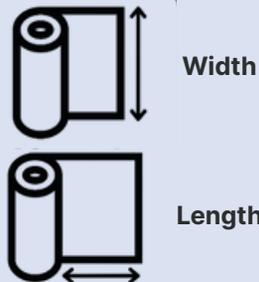

Unwinding, Rewinding  
& Precision cutting

From master logs to finished reels :  
clean, accurate, and efficient

We convert your technical film reels through a precise process of unwinding, slitting, and rewinding – delivering **optimal production** efficiency and **reduced operating costs**.

**Widths from 20 mm to 2100 mm**  
and **customised lengths** –  
technical films precisely tailored  
**to your requirements.**

## Applications

Building

Industry

Electronic

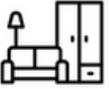

Transport

Luxury

Furnitures

## Benefits

Width ranging from  
**20 mm to 2100 mm**  
*Unlock the full potential  
of your reels.*

**Versatile material handling**  
Suitable for plastic films,  
composites, foams, textiles,  
aluminum, and membranes.

**Precision blades cutting**  
Achieve clean, uniform  
edges and flawless  
reel quality.

**Industrial quality**  
Stable process, reels  
ready for use or further  
processing

**Controlled tension**  
Perfect unwinding and  
rewinding without  
wrinkles, deformation,  
or tension marks
