

## TEMPORARY PROTECTIVE FILMS

Preserving the value of  
your surfaces

## CONVERTING

Cutomised length and  
width cutting

## LAMINATING

Tailored multi-materials  
bonding solutions

For over 35 years, STEP INTERNATIONAL has delivered engineered adhesive solutions and protective films, supported by precision converting services for customised rolls.

Present in 10 countries across Europe and North Africa, STEP INTERNATIONAL combines technical expertise, operational flexibility, and close partnership with industrial customers.

## SUSTAINABLE INDUSTRIAL PERFORMANCE

A solar-powered 950 m<sup>2</sup> production facility designed to improve energy efficiency, reduce carbon emissions and enhance working conditions while streamlining operations.

35 years of partnership

A stable and established **collaboration** ensuring consistent quality, secure supply and technical reliability.

# Surface protection film

Preserving your surface value

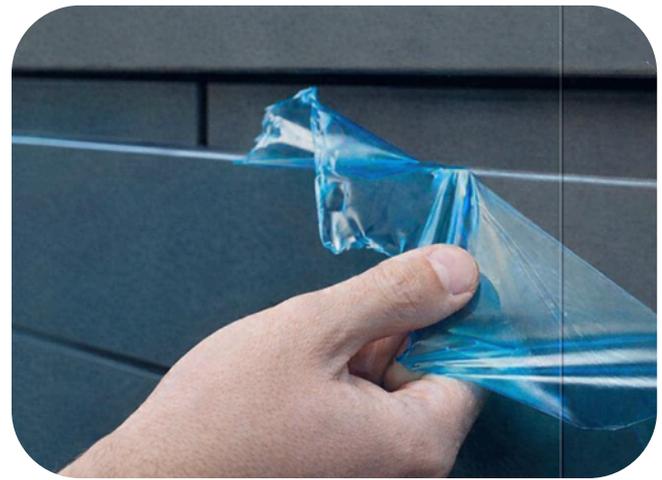

## Our Solutions

High-performance protection films **tailored to your needs**, ensuring reliable **protection** from storage to installation, indoor or outdoor.

## Our Markets

- ✓ Glass and Window profile
- ✓ Plastic Sheet
- ✓ Furniture
- ✓ Metal

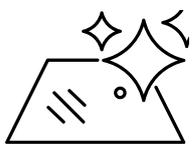

## Benefits

**Reliable Surface Protection**  
Protects sensitive surfaces during storage, transport and processing

**Multi-Material Compatibility**  
Suitable for glass, plastic, metal and coated surface

**Clean Removal**  
Leaves no residue and preserves surface quality

**Abrasion & UV Resistance**  
Durable protection, including outdoor exposure

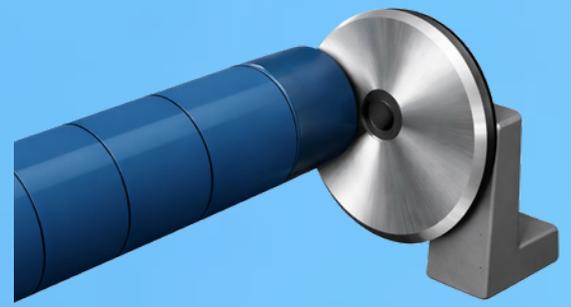

**Tailored Adhesion level**  
Adhesive coated or adhesive free

**Enhanced communication**  
Print your Brand's logo

# Converting film reels

Customised reel converting, engineered for you

## Our services

We **convert** your technical film reels through a meticulous process of **unwinding, longitudinal cutting, and rewinding.**

**Widths from 20 mm to 2100 mm**  
and **customised lengths** —  
technical films precisely tailored  
**to your requirements**

Length

Width

## Benefits

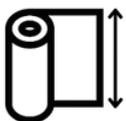

### Versatile material handling

Suitable for plastic films, composites, foams, textiles, aluminum, and membranes

**Precision blades cutting**  
Achieve clean, uniform edges and flawless reel quality

### Width ranging from 20mm to 2100mm

Unlock the full potential of your reels

**Controlled tension**  
Unwinding, Rewinding without wrinkles or imperfections

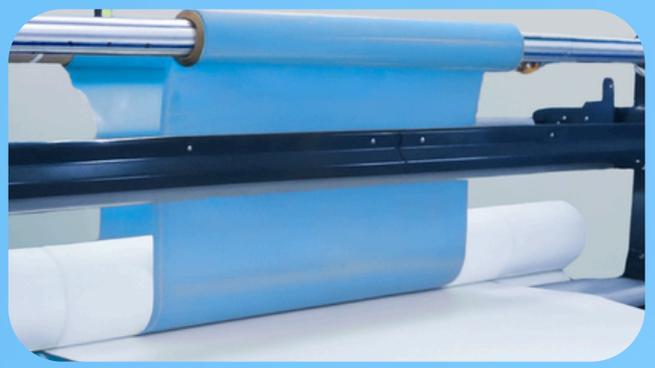

### Industrial quality

Stable process, reels ready for use or further processing

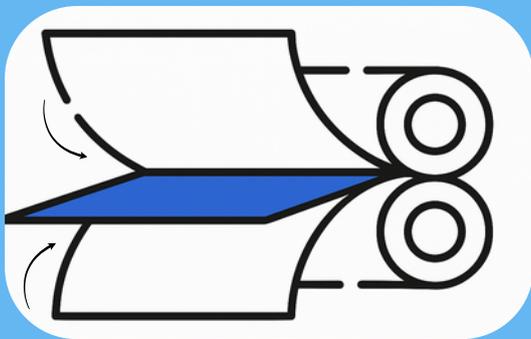

**Ready-to-Use Reels**  
Minimize handling, reduce waste, and improve line productivity

# Multi-layer Lamination solutions

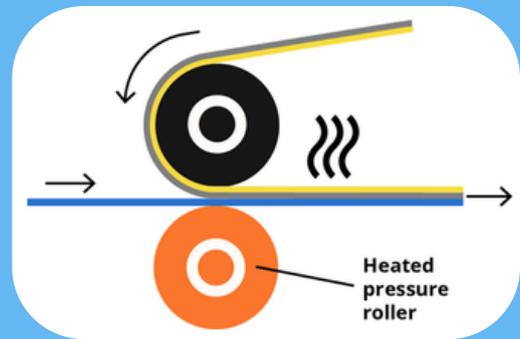

We offer lamination services, providing bonding solutions tailored to a wide range of industrial applications

## Adhesive Lamination

Adhesive is **applied cold** to a support and transferred to the substrate, enabling tailored **multi-material combinations**

## Lamination

**Heat-activated** hot-melt films are fused **under pressure** to create a robust, durable, and repositionable bond.

## Benefits

### Multi-layer lamination

Up to three substrates can be bonded in one step

### High bonding precision

Uniform adhesion

### Material versatility

Plastics, foams, adhesive tape, textiles, aluminum, paper, composites ...

### Eco-Friendly process

Solvent-free, promoting environmentally sustainable adhesion

### Enhanced material performance

Adhesion, cohesion, thermal and chemical resistance tailored to your requirements

### Industrial-grade quality

Consistent, repeatable results  
Pre-assembled multi-layer solutions

# Why Step International

*An agile and flexible partner, committed to delivering reliable and customised industrial solutions*

## SURFACE PROTECTION FILMS

Temporary protection films tailored to your application. Supplied with consistent quality through a leading European manufacturer

## CONVERTING EXPERTISE

Converting Expertise  
Films slit and rewound into rolls with precise widths and lengths to match your process needs

## TAILOR-MADE LAMINATING SOLUTIONS

Laminating and bonding technologies combine films, foams, papers and technical materials into customised multilayer solutions

## SUSTAINABLE INDUSTRIAL SOLUTIONS

Energy-efficient, solar-powered facility limiting environmental impact.  
Protection films help preserve surface value and reduce waste

## Industrial Applications

Automotive

Building

Electronics

Luxury

Military
